

For Immediate Release 7 April 2010

EADS Defence & Security selects Regeneris for TETRA support

- First-line support for public safety organizations in the United Kingdom
- Responsiveness in service delivery for the users of EADS devices

7 April 2010 – EADS Defence & Security (DS) have chosen Regeneris as partner in the United Kingdom to provide first-line support for emergency services and public safety organizations using TETRA radios for mission critical communication.

Regeneris will provide the repair, parts management, product customisation, warranty validation, contact centre support, and asset tracking of TETRA radios for the users of nationwide Airwave network. Regeneris will also be responsible for the secure end-of-life recycling of the devices in the UK.

“After a rigorous tendering process, we selected Regeneris because they bring us the speed, flexibility and quality of service gained through years of experience supporting mobile networks. With London 2012 on the horizon, we require a partner who can respond to requirements with a high sense of urgency.” says Marc Pieur de la Comble, Head of Security & Communication Solutions at EADS Defence & Security.

“We recognize that responsiveness, security and resilience are core to service delivery, and are committed to delivering rapid turnaround times, quality repair and logistics solutions for the users of EADS devices on the UK market. We are delighted that EADS have recognized our skills and capabilities.” says Sergio Tansini, Managing Director of Mobile Communications at Regeneris.
