

**3 September 2010**

**Regeneris plc**

**(“Regeneris” or the “Group”)**

**Contract Win with DHL Supply Chain**

***Centre aims to create scalable and replicable business model across international consumer electronics industry***

Regeneris plc (LSE: RGS), a leading provider of after-sales product support services to many of the world’s premier technology brands and DHL Supply Chain (“DHL”) announce today a development which will harness the logistics expertise and extensive infrastructure of DHL with the technical and process excellence, IT solutions and OEM relationships of Regeneris to deliver a rapid repair and return service, initially to the mobile phone sector in the UK. The contract is a four year, multi-million pound deal agreed between the two companies.

The implementation will be at the DHL facility in Normanton, West Yorkshire where together Regeneris and DHL will create a new “Centre of Excellence” for returned device management. Working in-house, Regeneris will provide the expert repair and refurbishment of mobile devices, as well as the systems to drive down total service costs. This, combined with DHL’s supply chain leadership in reverse logistics, will mean that telecom customers can now move to a market leading service combined with reduced inventory levels. It is anticipated that this new end-to-end technical service will raise the industry benchmark.

The one-stop service proposition will provide full end-to-end, pre and after-sales services to a wide range of technology clients – enabling inventory sharing, assembly and kitting, screening and repair, and call centre services – covering both avoidance of returns and retail support.

Gary Stokes, CEO of Regeneris said:

*“We are excited by the opportunities that this new venture between Regeneris and DHL Supply Chain could provide. By combining our complementary expertise we are creating a new service model for the industry that will benefit our clients and the service experience of the consumer alike. As we move forward together, we intend to offer this enhanced service to a broader customer base both in the UK and internationally.”*

Charles Stewardson, VP and Business Director at DHL Supply Chain said:

*“Keeping our clients’ customers delighted by their devices is ‘Job 1.’ By combining our proven reverse logistics solutions with the tried and tested technical capabilities of Regeneris in a single facility, we can deliver best in class after-sales support to the mobile sector – improving customer satisfaction and retention for the mobile industry.”*
